

1 CSC299 - Lab Assignment 9

Login into:

`mdp.cdm.depaul.edu`

Pick an API of your choice. For example one of the following:

`https://www.yelp.com/developers/faq`

`http://omdbapi.com/`

`http://www.myapifilms.com/`

`https://freemusicarchive.org/api`

`http://platform.seatgeek.com/`

Write code that allows to search the API using a simple search string for example a Movie title, or a song title, or a restaurant name, etc. fetches all results and stores them into a CSV file.

Save your code in a `csc299/lab09/program91.py`
